

Digital Classroom

William Colenso College offers a digital classroom for year seven students coming into our school. This classroom is to provide students with the skills to become successful, self-regulating modern learners.

Skills the students will learn:

- Basic ICT skills such as creating their own folders, opening word documents, saving and editing work.
- Supports on-going literacy and numeracy development.
- Learning safe and appropriate sites to research. Skimming and scanning for information, cutting and pasting, re-writing into own words.
- Supports enquiry learning with instant access to information in an ever-changing world.
- Creating power-points using a variety of drawing tools including paint.
- Building confidence in oral language by using voice recording over power-points or presentations.
- Designing ways to display maths data including a variety of graphs.
- Developing e-portfolios to display on-going work.

The digital classroom that is offered at William Colenso College is a positive, engaging and necessary way to enhance learning in all areas as well as keeping up with the 21st century.
